Fact Sheet

What is Clean Cities?

Clean Cities is a voluntary program of the U.S. Department of Energy for the expansion of the use of alternatives to gasoline and diesel fuel, acceleration of the use of alternative fuel vehicles, and the building of a local refueling infrastructure for these vehicles.

Why join the Tucson Regional Clean Cities Coalition?

Through its coalition of 76 members, the Clean Cities Coalition works with local businesses and government entities to guide them through the process necessary to establish the foundation for a viable alternative fuels market to help reduce dependence on foreign oil and reduce vehicle emissions, the single largest contributor to air pollution in many cities. These alternative fuels include biodiesel; ethanol (E85); compressed natural gas; hybrid electric, fuel cell and hydrogen technologies. In 2007, Clean Cities Coalition members displaced over 5 million gallons of petroleum.

What are the levels of commitment?

There are 2 levels of commitment a Coalition member can make: Saguario or Cholla. The Saguario membership category offers a higher level of engagement by PAG staff to support individual Coalition members. The Cholla membership category is designed to allow individuals and organizations to participate in the Clean Cities Coalition and be recognized for their efforts.

	Saguario	Cholla
Benefits	Research support Grant assistance Electronic communications from Clean Cities and invitations to events Assistance with outreach and marketing Member logo on the Clean Cities website Membership plaque	Electronic communications from Clean Cities and invitations to events Limited media support Listing of organization name on the Clean Cities website Membership certificate
