New PAG Specifications and Details documents available for purchase

The Pima Association of Governments' Standard Specifications, Details and Federal Aid Supplement have been updated.

The documents are made available to local governments, contractors and consultants in Pima County for use as a construction standard for roadway and other transportation-related public improvements. The documents serve as a regional standard for the majority of the construction in the region.

The 2015 edition can be purchased from Arizona Lithographers through the following link:
<http://apps.pagnet.org/standardspecifications>.

The complete set of documents is available in hard copy for \$75, plus a \$7 handling fee. Individual costs for the documents are: \$40 for the Specifications; \$30 for the Details and \$5 for the Federal Aid Supplement. Electronic copies also can be purchased.

The complete set includes text descriptions of the materials, methods and procedures to be used for the construction of public improvements; detailed drawings that describe standard construction project features and supplemental text and documentation that is required when federal funds are used for any part of the project.

Contract compliance officers from the agency managing a project should be contacted for confirmation of the most current standards they will be using for a particular project.

Pima Association of Governments is an association of local, state and tribal governments with a mission to build consensus among its members and the public on regional planning for transportation, energy, watershed and air quality. Please visit www.PAGregion.com or www.facebook.com/PAGregion for more information.
