

## Adopted 2040 Vision and Goals

The 2040 RTP envisions a premier, energy-efficient, and environmentally responsible regional transportation system that is interconnected, multi-modal, technologically advanced and integrated with sustainable land use patterns.

<b>Goals for the System:</b>	
<b>Multi-Modal Expansion</b>	A balanced network of expanding alternative mobility choices to meet rail, highway, transit, roadway, bicycle and pedestrian mobility needs.
<b>Integrated Transportation Choices</b>	A user-friendly transportation network that integrates modes within the region, connects to facilities outside the region and optimizes mobility for people and goods.
<b>Sustainable Land Use</b>	Vibrant, sustainable communities that link transportation and land use.
<b>Economic Sustainability</b>	A healthy growing economy well-served by the transportation network.
<b>Safety</b>	Safety and security for all transportation users across the region.
<b>Environmental Stewardship</b>	Environmental stewardship, natural resource protection and energy efficiency in transportation planning, design, construction and management.
<b>Accessibility</b>	Transportation options and access for all users including youth, elderly, low-income, and individuals with disabilities.
<b>System Performance</b>	Unobstructed mobility through efficient system operations.

<b>How We Get There:</b>	
<b>Public Input</b>	Continued outreach and involvement of all users in transportation decision-making.
<b>Advanced Technologies</b>	State-of-the-art, cost-effective delivery of transportation services and facilities.
<b>Funding and Implementation</b>	Revenue sources and strategies that ensure ample funding and timely project development.
<b>Accountability</b>	Continued transparency, responsiveness and coordination to meet transportation needs throughout the region.
