

Proposed Supplement to the Carbon Monoxide Limited Maintenance Plan for the Tucson Air Planning Area

Arizona State Implementation Plan Revision

The Carbon Monoxide Limited Maintenance Plan (CO LMP) for the Tucson Air Planning Area (TAPA) relies on the Vehicle Emissions Inspection Program (VEIP) as a control measure. In 2007, the Arizona Legislature approved SB 1531 in the 48th Regular Session to reauthorize the VEIP through January 1, 2017. Attached is a supplement to the CO LMP for the TAPA that includes SB 1531 and the Arizona Revised Statute, A.R.S. 41-3017.01 documentation that continues the State's VEIP through January 1, 2017. This information needs to be included in the CO LMP that is a part of the Arizona State Implementation Plan (SIP). Upon approval and adoption of this administrative SIP Revision, this supplement will be added to Appendix D (letter from the Arizona Department of Environmental Quality (ADEQ) re: the VEI Program) of the 2008 Revision to the CO LMP for the TAPA submitted to ADEQ in June 2008 and to the U.S. Environmental Protection Agency (EPA) in July 2008. This SIP Revision will be submitted to ADEQ for approval and submission to EPA. The 30-day public comment period begins on April 9, 2009, and a public hearing is being conducted for this proposed supplement to the CO LMP for the TAPA on May 11, 2009, at 3 p.m. at Pima Association of Governments. The related documentation is included in the links below.
