SUN RIDESHARE

Sun Rideshare, a regional commuter assistance program of Pima Association of Governments, offers transportation alternatives essential to the region's seamless transit system.

Sun Rideshare encourages people to carpool, vanpool, ride the bus, bike, or walk. The program also promotes alternative work arrangements, such as telework, and compressed workweeks. The Sun Rideshare online matching system provides quick information and helps you find the best transportation option for your daily commute.

Sun Rideshare is one of the region's many travel alternatives, which include Sun Tran, Sun Express, Sun Van and Sun Shuttle neighborhood transit service, and will eventually include the modern streetcar system. This regional seamless transit concept is an outcome of the transit component of the Regional Transportation Authority plan.

Choosing an alternative mode provides many benefits to you and the region. Benefits include: cost and time savings, reduced congestion and energy consumption, improved air quality, and reduced stress.

There's a new way to work and it begins with Sun Rideshare!

CARPOOL

Team up for your drive to work and save money today. Sun Rideshare offers an online matching system. Visit 884RIDE.org to enter your information and instantly find potential carpool partners.

VANPOOL

Ride a commuter van with 5 to 15 passengers. Pay a low monthly gas and lease cost. The more people who ride, the less each person pays. PAG provides a monthly subsidy to reduce your costs even further. Your employer also may provide a subsidy and the best part is that you can use pre-tax dollars to cover your costs.

TRANSIT

Sun Rideshare also helps you plan your transit commute.

Sun Tran – the region's mass transit system serving the metropolitan Tucson area.

Sun Express – providing direct service to and from commercial/retail, downtown Tucson and the University of Arizona.

Sun Van – para transit agency serving individuals unable to use Sun Tran due to their disability.

Sun Shuttle – neighborhood transit service in Marana, Oro Valley/Catalina and Sahuarita/Green Valley. The service links residents to medical facilities, libraries, grocery stores and other neighborhood destinations, and links to the main Sun Tran system.

Modern Streetcar – the streetcar system will link the University of Arizona and University Medical Center to the west end of downtown Tucson, including points in between, such as 4th Avenue. This new system is expected to start operation as early as 2012.

BIKE/WALK

Biking or walking to work is a growing option as more bike racks and storage lockers become available at the workplace, shopping centers or industrial locations. An ideal commute is in the 5- to 10-mile range and biking with an experienced rider is a good way to give it a try. Enhance the safety of your bike commute with a bike buddy found with Sun Rideshare's online matching system. Map your route with the Tucson Metro Bike Map, also available online.

ALTERNATIVE WORK ARRANGEMENTS

Telework and compressed work weeks are two options to minimize your drive time. Telework allows you to work at a location other than your main office.

Talk to your employer about working a compressed work week, such as four, 10-hour days or work 80 hours over nine days. Start saving today!

GUARANTEED RIDE HOME

When using an alternative mode, you need not worry about being stranded at work. The Guaranteed Ride Home

program, available through Sun Rideshare and Sun Tran, offers four taxi vouchers – four free rides during a 12-month period – to Pima County residents who work in the county, use alternate modes at least twice a week, and register with the Guaranteed Ride Home program.

PARK-AND-RIDE

To assist with your commute options, park-and-ride lots are conveniently located throughout the region. Find a lot near your home or along your commute.
